

FACTORY ACCREDITED:

RoHS

TECHNICAL DATA

Size Range:	10mm - 50mm
Suitable for:	Water, air and oil under 20 CST
Maximum Temperature:	120°C
Voltages available:	24VAC, 240VAC, 12VDC, 24VDC, 110VAC
Connections:	BSPF (standard) NPT or flanged (optional)

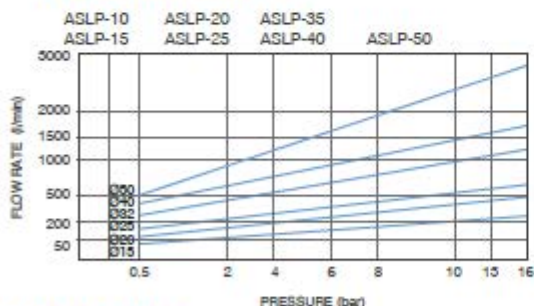

The ASLP range is a pilot operated solenoid valve that will work from 0.5 bar pressure and is available in brass or stainless steel. Models include ASLP which is normally closed (energise to open) or ASLPH normally open (energise to close).

All models feature investment cast body, interchangeable coils and Viton diaphragm.

FEATURES

- Normally closed & normally open models.
- Brass or stainless steel body materials.
- Viton diaphragm, others available on request.
- LED din plug available.
- All voltages interchangeable.
